

Soul Astrology: The First Six Signs

Aries; Taurus; Gemini; Cancer; Leo; Virgo

Personal Level - Personal Development - Individuality

Signs modify or condition the universal energies of the planets. They do not change their basic meaning but show HOW these energies are expressed. They represent the stages of development that we must master in our usage of the universal energies of the planets to develop our individuality and our universality.

Aries ♈ – Keywords: I Am I Become

Aries is about beginnings, the self, initiative, and leadership. Aries is a cardinal fire sign so Aries wants to initiate action. Wherever Aries is in the chart is where we begin our spiritual growth. Energies are self-centered and self-directed so we must use the energies to fulfill the needs of the soul rather than the desires of the personality self. The soul growth is learning to express the inner self through the personality self.

Taurus ♉ - Keywords: I Have I Hold

Taurus is practical, persistent, and down to earth. It deals with possessions, values, and self-esteem. Taurus is a fixed Earth sign so energies in Taurus deal with the practical. Here you determine what is needed to build and sustain the "self" you started to develop in the cardinal fire sign of Aries. The soul growth here is to acquire detachment and build a true sense of values, not just material possessions.

Gemini ♊ - Keywords: I Think I Comprehend

Gemini is the sign of the conscious mind. It is how you think and communicate. It is a mutable air sign and therefore is versatile, adaptable and intellectual. It takes the understanding of the self and the values acquired in Aries and Taurus and communicates and/or modifies this understanding. The soul growth here is to use the conscious mind to direct the personality self to manifest the needs of the spiritual self not just the desires of the personality self.

Soul Astrology: The First Six Signs

Cancer ♋ - Keywords: I Feel I Am Receptive I Am Sensitive

Cancer is a cardinal water sign and energies in this sign will initiate action fueled by the emotions. It is the sign of instinctual consciousness and represents the Nurturing Mothering principle. It is here that we begin to express our emotional nature. The emotions triggering action are those brought back from past lives. The soul growth here is to apply reason to these emotions and make necessary adjustments.

Leo ♌ - Keywords: I Will I Project

Leo is a fixed fire sign. It is the sign of creativity and individuality and it is here you build and make use of the "self" you started to develop in the cardinal fire sign of Aries. The soul growth here is to develop humility and compassion and to not allow your self-expression to become an ego builder. Self-discipline and self-responsibility must be exercised to achieve this soul growth.

Virgo ♍ - Keywords: I Analyze I Serve

Virgo is a mutable earth sign. It is practical, down to earth, analytical, critical and adaptable. It deals with patience and service. The soul growth in Virgo is achieved through a critical self-analysis and adjustments as needed to conform to our potential and spiritual ideal.
